Nikkiso Clean Energy & Industrial Gases Group Wins Multiple Hydrogen Fueling Station Contracts in California and Korea

Nikkiso Clean Energy & Industrial Gases Group ("CE&IG"), a part of the Nikkiso Group, is proud to be the recipient of multiple contracts to provide over a dozen Hydrogen Fueling Stations ("HFS") to customers in California and South Korea. These stations, intended to be operational between Q4 2023 and Q2 2024, cover fueling stations for light-duty, heavy-duty, and transit fuel cell vehicles that need H35 and H70 dispensing.

"As an ambassador member of the California Fuel Cell Partnership ("CaFCP") and core leader of cryogenic technology, Nikkiso is key in connecting the hydrogen ecosystem to advance the clean energy agenda," said Peter Wagner, CEO of CE&IG.

"We are pleased to offer flexible and scalable commercial and technical offers where our customers need us the most: from equipment fabricator to turnkey EPC solutions," said Joseph Pak, President of the Nikkiso Integrated Cryogenic Solutions.

The purchase orders have a combined value of almost US\$60 million. CE&IG has dedicated over 150,000 ft² (14,000 m²) square feet of floor space to mass produce hydrogen fueling stations in Murrieta, CA, Escondido, CA, Busan, S. Korea, and Neuenbürg, Germany. Every station will be manufactured to comply with the local content requirements, including the Buy America Act for the US Hydrogen Hub market.

Starting with these hydrogen station projects, the Nikkiso Group aims to further expand its hydrogen-related business by strengthening its participation in the hydrogen supply chain and expanding into the global market.

< About CE&IG >

CE&IG is part of the Nikkiso Group. Nikkiso is a \$1.4B public company. CE&IG comprises five distinct functional units: Cryogenic Pumps (ACD, Nikkiso Cryo), Process Systems (Cosmodyne), Heat Exchanger Systems (Cryoquip), Cryogenic Services (through 20 global facilities) and Integrated Cryogenic Solutions (providing centralized management of products and project development). In 2020, CE&IG expanded its capabilities further with the acquisition of what was GP-Strategies' Alternative Fuels Division. This addition provides yet another major manufacturing facility in Southern California. Acknowledged as a market leader in the design, engineering, manufacturing, construction and maintenance of Cryogenic infrastructure, this facility offers full in-house capabilities from engineering & permitting through manufacturing, construction, and maintenance.

For over 50 years, CE&IG has been a leader in the Clean Energy industry and is leading the change to a healthier world. With our hydrogen fueling technology, CE&IG has become a leader in the evolving hydrogen revolution, including a project on the world's first LH₂ bunkering facility. <About Nikkiso>

Company Name: NIKKISO CO., LTD.
Head Office: Yebisu Garden Place Tower 22nd Floor, 20-3, Ebisu 4-Chome,
Shibuya-ku, Tokyo 150-6022, Japan
Date of Establishment: December 26, 1953
President & CEO: Toshihiko Kai
Business Overview: Nikkiso provides specialized pumps and systems in the Industrial
Business, CFRP (carbon fiber reinforced plastic) aircraft parts in the
Aerospace Business and hemodialysis, and healthcare related products
in the Medical Business.
